

The pdfcolmk package

Heiko Oberdiek*

<heiko.oberdiek at googlemail.com>

2016/05/16 v1.3

Abstract

This package tries a solution for the missing color stack of pdf \TeX .

1 Documentation

1.1 Introduction

This package uses a mark register in order to solve the problem of a missing color stack of pdfTeX prior 1.40.0. Since this version of pdfTeX a color stack is available and supported by pdfTeX.def 2007/01/01 v0.04a. In this case this package is obsolete and the package stops its loading.

1.2 Background

After the Dante meeting (Clausthal 2000) I have started to experiment with the eTeX method of a *colour* mark. One of the major problems is the understanding of the output routine and the need to rewrite it because of missing hooks. Currently I have made some tests in in onecolumn and twocolumn mode, but the state is experimental.

1.3 Limitations

- Mark limitations: page breaks in math.
- L^AT_EX's output routine is redefined.
 - Changes in the output routine of newer versions of LaTeX are not detected.
 - Packages that change the output routine are not supported.
- It does not support several independent text streams like footnotes.
- Limitations in float and marginpar support.

1.4 Recommendation

ϵ -T_EX (for additional mark register) Without ϵ -T_EX L^AT_EX's mark commands are redefined to store an additional color value.

1.5 Usage

Load after package color:

```
\usepackage[pdfTeX]{color}
\usepackage{pdfcolmk}
```

1.6 Compatibility

- Load the following packages after pdfcolmk:
 - mparhack.sty
- Load the following packages before pdfcolmk:
 - marn.sty
 - newmarn.sty
- Supported \@addmarginpar patch:
 - latex/base/latex.ltx
 - memoir.cls
 - poemscol/marn.sty, poemscol/newmarn.sty
 - mparhack.sty

- Unsupported \@addmarginpar patch:

```

lineno.sty
sttools/marginal.sty
revtex4.cls

```

2 Implementation

```

3 Installation

3.1 Download

Package. This package is available on CTAN¹:

[CTAN:macros/latex/contrib/oberdiek/pdfcolmk.dtx](http://ctan.org/pkg/pdfcolmk) The source file.

[CTAN:macros/latex/contrib/oberdiek/pdfcolmk.pdf](http://ctan.org/pkg/pdfcolmk) Documentation.

Bundle. All the packages of the bundle ‘oberdiek’ are also available in a TDS compliant ZIP archive. There the packages are already unpacked and the documentation files are generated. The files and directories obey the TDS standard.

[CTAN:install/macros/latex/contrib/oberdiek.tds.zip](http://ctan.org/pkg/pdfcolmk)

TDS refers to the standard “A Directory Structure for \TeX Files” ([CTAN:tds/tds.pdf](http://ctan.org/pkg/ttds)). Directories with `texmf` in their name are usually organized this way.

3.2 Bundle installation

Unpacking. Unpack the `oberdiek.tds.zip` in the TDS tree (also known as `texmf` tree) of your choice. Example (linux):

```
unzip oberdiek.tds.zip -d ~/texmf
```

¹<http://ctan.org/pkg/pdfcolmk>

Script installation. Check the directory `TDS:scripts/oberdiek/` for scripts that need further installation steps. Package `attachfile2` comes with the Perl script `pdfatfi.pl` that should be installed in such a way that it can be called as `pdfatfi`. Example (linux):

```
chmod +x scripts/oberdiek/pdfatfi.pl
cp scripts/oberdiek/pdfatfi.pl /usr/local/bin/
```

3.3 Package installation

Unpacking. The `.dtx` file is a self-extracting `docstrip` archive. The files are extracted by running the `.dtx` through plain \TeX :

```
tex pdfcolmk.dtx
```

TDS. Now the different files must be moved into the different directories in your installation TDS tree (also known as `texmf` tree):

```
pdfcolmk.sty → tex/latex/oberdiek/pdfcolmk.sty
pdfcolmk.pdf → doc/latex/oberdiek/pdfcolmk.pdf
pdfcolmk.dtx → source/latex/oberdiek/pdfcolmk.dtx
```

If you have a `docstrip.cfg` that configures and enables `docstrip`'s TDS installing feature, then some files can already be in the right place, see the documentation of `docstrip`.

3.4 Refresh file name databases

If your \TeX distribution (`te \TeX` , `mik \TeX` , ...) relies on file name databases, you must refresh these. For example, `te \TeX` users run `texhash` or `mktextlsr`.

3.5 Some details for the interested

Unpacking with \LaTeX . The `.dtx` chooses its action depending on the format:

plain \TeX : Run `docstrip` and extract the files.

\LaTeX : Generate the documentation.

If you insist on using \LaTeX for `docstrip` (really, `docstrip` does not need \LaTeX), then inform the autodetect routine about your intention:

```
latex \let\install=y\input{pdfcolmk.dtx}
```

Do not forget to quote the argument according to the demands of your shell.

Generating the documentation. You can use both the `.dtx` or the `.drv` to generate the documentation. The process can be configured by the configuration file `ltxdoc.cfg`. For instance, put this line into this file, if you want to have A4 as paper format:

```
\PassOptionsToClass{a4paper}{article}
```

An example follows how to generate the documentation with `pdf \LaTeX` :

```
pdflatex pdfcolmk.dtx
makeindex -s gind.ist pdfcolmk.idx
pdflatex pdfcolmk.dtx
makeindex -s gind.ist pdfcolmk.idx
pdflatex pdfcolmk.dtx
```

4 Catalogue

The following XML file can be used as source for the [T_EX Catalogue](#). The elements `caption` and `description` are imported from the original XML file from the Catalogue. The name of the XML file in the Catalogue is `pdfcolmk.xml`.

```
449 (*catalogue)
450 <?xml version='1.0' encoding='us-ascii'?>
451 <!DOCTYPE entry SYSTEM 'catalogue.dtd'>
452 <entry datestamp='$Date$' modifier='$Author$' id='pdfcolmk'>
453   <name>pdfcolmk</name>
454   <caption>Improving colour support under pdftex.</caption>
455   <authorref id='auth:oberdiek' />
456   <copyright owner='Heiko Oberdiek' year='2000,2005-2008' />
457   <license type='lppl1.3' />
458   <version number='1.3' />
459   <description>
460     The package provides macros that emulate the 2018;colour stack
461     functionality of dvips. The colour stack deals with colour
462     manipulations when asynchronous events (like page-breaking) occur;
463     pdftex does not (yet) have such a stack, but dvips does, and the
464     color package makes extensive use of
465     it.
466     <p />
467     This package is an experimental solution to the problem, and works
468     best with pdf-e-tex.
469     <p />
470     The package is part of the oberdiek bundle.
471   </description>
472   <documentation details='Package documentation'

479 </catalogue>
```

5 History

[2000/08/27 v0.1]

- First published version in newsgroup [comp.text.tex](#):
“[pdftex: bug with colors?](#)”²

[2000/09/02 v0.2]

- Next try.

[2000/09/02 v0.3]

- Solution without ϵ -T_EX added.

[2000/09/06 v0.4]

- Patch commands added.
- Patch for seminar.cls added.

²Url: <http://groups.google.com/group/comp.text.tex/msg/6f088e69e4085d2c>

[2000/09/06 v0.5]

- Bug fix: initialization of `\pec@value` added.

[2005/06/15 v0.6]

- Support for `\marginpar` added. See thread in [comp.text.tex](#): “Using `\textcolor` and `\marginpar` together”³

[2005/07/09 v0.7]

- Output support added for memoir, provided by Lars Madsen.

[2006/02/20 v0.8]

- Code is not changed.
- DTX framework.

[2007/01/01 v1.0]

- If `pdftex.def` \geq 2007/01/01 v0.04a is used with `pdfTeX` \geq 1.40.0, then package `pdfcolmk` is obsolete.

[2007/04/11 v1.1]

- Line ends sanitized.

[2008/08/11 v1.2]

- Code is not changed.
- URLs updated.

[2016/05/16 v1.3]

- Documentation updates.

6 Index

Numbers written in *italic* refer to the page where the corresponding entry is described; numbers underlined refer to the code line of the definition; plain numbers refer to the code lines where the entry is used.
