

The `eso-pic` package*

Rolf Niepraschk
Rolf.Niepraschk@gmx.de

1 Introduction

This package makes it easy to add some picture commands to every page at absolute positions.

2 Usage

See also the example L^AT_EX documents (`eso-*.tex`).

2.1 Basic commands for adding L^AT_EX stuff to the page background

`\AddToShipoutPictureBG`

All the picture commands which are parameters of an `\AddToShipoutPictureBG` command will be added to the internal macro `\ESO@HookIBG`. This macro is part of a zero-length `picture` environment with basepoint at the lower left corner of the page (default) or at the upper left corner (package option "texcoord"). The `picture` environment will be shipped out at every new page.

`\AddToShipoutPictureBG*` works like `\AddToShipoutPictureBG` but only for the current page. It used the internal macro `\ESO@HookIIBG` which contents will be removed automatically.

For compatibility the macros `\AddToShipoutPicture` and `\AddToShipoutPicture*` are aliases for `\AddToShipoutPictureBG` and `\AddToShipoutPictureBG*`.

Works like `\AddToShipoutPictureBG` but the picture commands are on the top oft the normal document content.

A call of `\ClearShipoutPictureBG` clears the contents of `\ESO@HookIBG`.

For compatibility the macro `\ClearShipoutPicture` is an alias for `\ClearShipoutPictureBG`.

A call of `\ClearShipoutPictureFG` clears the contents of `\ESO@HookIFG`.

Allows a length as parameter to a picture command. Note that this macro is no more necessary when using `\usepackage{picture}`.

`\gridSetup[gridunitname]{gridunit}{{labelfactor}}{griddelta}{{gridDelta}}{gap}`. For details see the implementation section.

*This document corresponds to `eso-pic` v2.0h, dated 2018/04/12.

```
\AtPageUpperLeft    Helper macros for easier positioning on the page.
\AtPageLowerLeft
\AtPageCenter
\AtTextUpperLeft
\AtTextLowerLeft
\AtTextCenter
\AtStockUpperLeft
\AtStockLowerLeft
\AtStockCenter
```

2.2 Package options

Option	Value	Comments
<code>pscoord</code>	empty or <i>true, false</i>	The zero point of the coordinate system is the lower left corner of the page (the default).
<code>texcoord</code>	empty or <i>true, false</i>	The zero point of the coordinate system is the upper left corner of the page.
<code>grid</code>	empty or <i>true, false</i>	A grid is drawing; default: false.
<code>gridBG</code>	empty or <i>true, false</i>	Put the grid in the background; default: false.
<code>gridunit</code>	<i>mm, in, bp, pt</i>	Distance between gridlines are multiples of <code>gridunit</code> . default: mm.
<code>gridcolor</code>	a valid color name	Color of the main gridlines; default: black
<code>subgridcolor</code>	a valid color name	Color of the subgridlines; default: black.
<code>subgridstyle</code>	<i>solid or dotted</i>	'dotted' is very slow! default: solid.
<code>colorgrid</code>	empty or <i>true, false</i>	Shortcut for 'grid=true', 'gridcolor=red' and 'subgridcolor=green'; default: false.
<code>dvips</code>	empty or <i>true, false</i>	Is also true if the package option <code>dvips</code> is used by <code>color</code> or <code>graphics</code> . If true package <code>eepic</code> is loaded for better performance of dotted lines.

3 Implementation

3.1 The main functionality

```
1 \RequirePackage{atbegshi}

341   \fi
342 \fi
```

Change History

v0.4		added.	9
	General: Initial version	1	v1.1b
v0.5		General: New command	
	General: Some bug corrections . . .	1	<code>\AtPageLowerLeft</code>
v0.6		New package options "texcoord"	
	General: Some corrections for		and "pscoord"
	compatibility with the <code>html</code>		1
	package suggested by Ross		
	Moore and a licence note	1	
v0.7		General: Remove the	
	General: New command		disadvantageous check of
	<code>\AddToShipoutPicture*</code>	1	'pdfTeX'. Now using with
v1.0		<code>XeLaTeX</code> should be possible. . .	7
	General: New commands		
	<code>\LenToUnit,</code>		<code>\AtStockCenter</code> : New
	<code>\AtPageUpperLeft,</code>		<code>\AtStockLowerLeft</code> : New
	<code>\AtPageCenter,</code>		<code>\AtStockUpperLeft</code> : New
	<code>\AtTextUpperLeft</code> , and		<code>\AtTextUpperLeft</code> : Works now for
	<code>\AtTextCenter.</code>	1	class <code>memoir</code>
v1.0a		General: Better test of color/xcolor	7
	<code>\ClearShipoutPictureFG:</code>		
	Changed <code>\let</code> to <code>\global\let</code>		<code>\AddToShipoutPictureFG</code> : New
	(suggested by Alberto Lusiani).	5	command
v1.0c		<code>\AddToShipoutPictureFG</code>	5
	General: New command		
	<code>\AtTextLowerLeft</code> and		<code>\AtBeginShipoutUpperLeftForeground</code> :
	corrections to		bugfix for <code>memoir</code> class
	<code>\AtTextUpperLeft.</code>	1	(reported by YI Hoze)
v1.0d		<code>\AtTextUpperLeft</code> : Wrong	
	<code>\LenToUnit</code> : Using		horizontal position in
	<code>\providecommand</code> instead of		one-column mode
	<code>\newcommand</code> for <code>\LenToUnit</code> . . .	2	3
v1.1		<code>\AtTextUpperLeft</code> : Wrong	
	General: New commands and		
	package options for background		
	grids.	1	
v1.1a		<code>\LenToUnit</code> : Changed definition	
	<code>\ESO@gridpicture</code> : Font setting		for better compatibility with

package <code>curve2e</code> suggested by Claudio Beccari.	2	New macro <code>\ESO@HookIIIFG</code> for foreground grid.	4
v2.0g		New option ‘gridBG’.	6
General: Foreground/background grid.	10	v2.0h	
New <code>\ifESO@gridBG</code> for foreground/background grid. . .	6	General: <code>\@classoptionslist</code> must not be <code>\relax</code>	7

Index

Numbers written in italic refer to the page where the corresponding entry is described; numbers underlined refer to the code line of the definition; numbers in roman refer to the code lines where the entry is used.
